- You can NOT get insurance through a workplace or a spouse’s workplace AND
- You can NOT get public insurance, like Medicare or MaineCare AND

Some people may be able to enroll in Marketplace health insurance plan even if Open Enrollment is over. For example, you may be able to get a Special Enrollment Period if you recently:

- Got married
- Lost other health coverage
- Had a baby or adopted a child
- Were released from jail
- Changed immigration status
- Moved to an area with new health plans
- Have increased income

Special enrollment periods only last 60 days. They also have restrictions. To find out if you can enroll, call the Consumer Assistance HelpLine at 1-800-965-7476.

There are two kinds of help people can get to lower costs.

**Preimums**

You may be able to get lower costs on your monthly premium payments, based on your income. This help is called an advanced premium tax credit. These tax credits can be used each month to lower your monthly premium payments. You can only get this help for plans you buy on the Health Insurance Marketplace.

**Out-of-Pocket Costs**

Some people may also be able to cut out-of-pocket costs, based on income. These are called cost sharing reductions. People eligible for this help can get it by picking a “Silver” plan on the Health Insurance Marketplace.
